## Stabilizing services and products

We offer stabilizing service for various woods up to full-length gunstocks, ivory, bone, antler, some metals and other materials. Turnaround time is generally very short...as little as one day or less for local customers.

### Products listing:

#### Imported woods

- \* African Mahogany
- \* Amaranth
- \* Arizona Ironwood
- \* Black Palm
- \* Bocote
- \* Bubinga
- \* Ebony

- \*\* B
- \*\* C
- \*\* D
- \*\* E
- \*\* F
- G Laminated wood

#### Miscellaneous Materials

- \* Ivory
- \* Antler
- \* Bone
- \* Horn
- Some metals

\* These items are currently available in small quantities. Unmarked items will be added when available. Walnut and white pine is available in large quantities.

\*\* The listing under manufactured woods above consists of a number of ideas under development. These products will be added and described as the development is completed. Item G is manufactured under one or more trademarked names and is widely available elsewhere. However, Custom laminated wood is easily produced to your specifications.

Generally, most of the above items are straight grained. More highly figured woods made from burls, crotch wood, stumps and spalted wood will be added, as they become available. Please check the web site for availability.

Pricing for custom stabilized products will depend on the amount (measured by actual weight) of resin required and CANNOT be provided in advance. Items to be stabilized should be relatively porous and contain a maximum of 6% moisture content. We will kiln dry your item if necessary but cannot guarantee the item will be free of cracks after drying.

A few of the currently available products are shown below. Please visit the appropriate section of the web site for further information.

The following photos represent a few of the currently available items on hand. It is not all-inclusive, as we do have some ivory, bone, antler, ebony and a few other items available. Please consult the list above. Additional photos will be added as time permits and/or materials become available.

Amaranth

Arizona Ironwood

Birds eye maple

Black palm

Bocote

Bubinga

Kingwood

Olive

Spalted alder

Tulip

Wingee

Zebra

The next few items were originally purchased as knife handle material (from Jantz knife making supply if I recall correctly). I've had them so long, I've forgotten what some are and have labeled them as to what I think they are. These items, are not suitable for grip caps, but ARE suitable for grip cap inserts.

"Agate, blue"

Green dyed wood

Red dyed wood

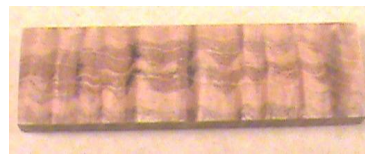

"Turquoise"

The next few photos of various pieces of stabilized maple I recently received for experimental purposes. These are too thin for grip caps but are suitable for inserts.

Maple #1

Maple #2

Maple #3

Maple #4

Maple #5

Maple #6

The type of wood in the next few photos is unknown...but I strongly suspect they are maple.
